DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Larry Sewell on March 04, 2005.

The application has been amended as follows:

In The Claims

Claim 1, in line 23, replace "vector" with - -structure- -.

Allowable Subject Matter

2. Claims 1-33 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest a context switch and controller block operable to retrieve latest state-specific context information from a context storage area based on the SAP and CID and a generic state logic program structure operable to process at least a portion of the input event structure based on the latest state-specific context information to generate next-state context information and at least an output event vector including at least one SAP and at least one CID associated with a select destination point to which the next-state context information is to be routed, wherein the next-state context information is operable to be

Art Unit: 2667

stored in the context storage area based on a storage SAP and CID provided in the input event structure, as specified in independent claims 1 and 27.

The prior art does not teach or fairly suggest a context memory block disposed between link control processor and data transfer controller for storing state-specific context information based on a service access point (SAP) and a connection identifier (CID) associated with at least one of the protocol stack layers across at least one active connection maintained by the application node in the network; the context information for personalizing the generic state processing architecture to effectuate functionality of a select protocol stack layer, as specified in independent claim 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
